Gopi Chand Mulaveesala

Data Analyst

GitHub | LinkedIn | Portfolio | Gmail | +91 9573739351 | Hyderabad, India

Professional Summary

Results-oriented Data Analyst with hands-on expertise in SQL, Python, Power BI, and DAX, delivering end-to-end analytics solutions from data ingestion and ETL pipeline design to interactive dashboard development and KPI reporting. Proficient in data cleaning, data modeling, exploratory data analysis (EDA), trend analysis and business intelligence to support data-driven decision-making. Experienced with relational databases (MySQL) and BI tools (Power BI, Tableau).

Experience

Real-Time E-Commerce Analytics Pipeline | Python, MySQL, Power BI, Pandas

- Designed and implemented a normalized relational database schema in MySQL to handle continuous data streams, supporting 4+ entity tables (orders, payments, customers, reviews) for a simulated live e-commerce environment.
- Developed a Python-based real-time data generator using `mysql-connector` and `Faker`, streaming 1,000+ live transactions per session directly into the database with automated error handling.
- Executed deep-dive Exploratory Data Analysis (EDA) on streaming data using Pandas and Matplotlib, identifying hourly sales trends and isolating a 12% transaction failure rate to guide business decisions.
- Architected a live interactive BI dashboard in Power BI using DirectQuery mode and 5-second Auto-Page Refresh, enabling zero-latency monitoring of KPIs — Average Order Value (AOV), Revenue, and Payment Success Rate — for real-time stakeholder reporting.

Projects

HR Analytics Dashboard | Power BI, Power Query, DAX, Data Modeling

- Designed a comprehensive HR analytics system tracking employee attrition, performance scores, and workforce distribution across 3+ departments, enabling identification of high-risk employee segments.
- Built custom DAX measures, KPI cards, and trend charts using time-intelligence functions; automated data cleaning via Power Query.

Blinkit Sales Analysis | Excel (Advanced), Power Pivot, VLOOKUP, Pivot Tables

- Built an interactive Excel dashboard with dynamic Pivot Tables and Power Pivot data models, analyzing category-wise sales trends and delivery KPIs across 8+ product segments.
- Cleaned and standardized large sales datasets from multiple sources, ensuring structured data preparation for accurate analysis and performance tracking.

Skills

SQL:	Joins, Aggregations, Subqueries, Window Functions, Data Extraction, Data Validation
Excel:	Pivot Tables, Power Query, Power Pivot, VLOOKUP, Data Cleaning, Advanced Reporting
Business Intelligence:	Power BI (DirectQuery, DAX, RLS, Auto-Refresh), Tableau, Dashboard Development, KPI Reporting
Programming:	Python (Pandas, NumPy, Matplotlib, Seaborn, SQLAlchemy), DAX, HTML, CSS
Analytics:	Exploratory Data Analysis (EDA), Trend Analysis, Anomaly Detection, Statistical Analysis, ETL Pipeline Design, Data Modeling, Data Transformation
Tools & Platforms:	MySQL Workbench, Jupyter Notebook, Git, Antigravity

Education

2019–2025	Integrated Bachelor's Degree in Engineering, **IIIT Nuzvid**	GPA: 8.0 / 10.0
2019	SSC, **ZPHS Panguluru**	GPA: 10.0 / 10.0

Certifications

- AICTE Data Analyst Internship — Government-recognized data analytics program
- Analyzing and Visualizing Data with Power BI — edX (Microsoft)
- Python for Data Analytics — Kaggle Certified
